

REMARKS

This amendment is presented under Rule 312 after Notice of Allowance.

The present amendment is made to correct an obvious error in Claim 66. Specifically, the preamble of Claim 66 incorrectly stated that the claim is directed to “An optical head apparatus.” However, this is not correct on its face since the claim later recites “a motor ... and a control circuit for receiving a signal from the optical head apparatus to control drive of the optical head apparatus and the motor based on the signal.” (Emphasis added). Thus, it is clear from the language of the claim that the optical head apparatus is a part of an apparatus that also includes a motor and a control circuit.

Claim 66 is amended herein to correctly recite

“An optical information apparatus comprising:

an optical head apparatus ...;

a motor ...; and

a control circuit for receiving a signal from the optical head apparatus to control drive of the optical head apparatus and the motor based on the signal.”

It is submitted that the present Rule 312 Amendment should be entered as being related to matters of form not affecting the scope of the claims.

The Examiner is invited to contact the undersigned by telephone should there be any issues with respect to entry of this amendment.

Respectfully submitted,

Kanji WAKABAYASHI et al.
